EXPERIENCE

I am seeking opportunities within an organization where I can continuously enhance my skills and contribute meaningfully to its growth. With **nearly 4 years of experience** in full-stack development, I bring strong expertise in building scalable applications and handling complex systems. I am eager to take on diverse roles and responsibilities that broaden my perspective and support my professional growth. I have the **ability to lead and collaborate with teams**, ensuring efficient execution and high-quality outcomes. I am committed to leveraging my experience to drive innovation, improve performance, and deliver impactful solutions

SKILLS

- **Languages:** JavaScript, TypeScript
- **Frontend:** React.js, Next.js, HTML, CSS
- **Backend:** Node.js, Express.js, NestJS, Socket.IO
- **Databases:** MongoDB, Redis, MySQL
- **Tools & Platforms:** Git, GitHub, Bitbucket, Jira

PROFESSIONAL SYNOPSIS

Dotsquares (MERN Stack Developer)

April 2025 – Present

- Managed multiple projects, led client discussions, and translated business requirements into scalable technical solutions
- Coordinated with cross-functional teams to ensure smooth execution, timely delivery, and high-quality outcomes
- Designed and developed frontend and backend systems and APIs, taking end-to-end ownership with a focus on performance, scalability, and continuous improvement

eBizneeds Buisness Solution (Sr. Software Developer - MERN)

September 2024 – March 2025

- Managed and developed multiple microservices (mail, chat, calendar, feed), ensuring scalability, performance, and seamless integration
- Designed and optimized backend systems with efficient inter-service communication and robust API architecture
- Implemented real-time features using Socket.IO and collaborated across teams for reliable deployment and continuous improvement

Mobzway Technologies (MERN Stack Developer)

January 2023 – September 2024

- Developed engaging game features and scalable game logic using Node.js, ensuring interactive and fair gameplay
- Implemented real-time chat systems with Socket.IO and built secure APIs for authentication and seamless user experience

Agryd Social Interactive Pvt. Ltd. (Software Developer)

May 2022 – January 2023

- Developed scalable web applications using React.js and Node.js, ensuring smooth performance and responsiveness
- Designed and implemented a real-time chat system using Socket.IO

EDUCATION

Pursuing Master of Computer Application (MCA)

Vivekananda Global University (VGU)

Jaipur, Rajasthan

Bachelor of Science in Physics, Mathematics, Computer Science (PMCS)

Jai Narain Vyas University (JNVU)

Jodhpur, Rajasthan

PROJECTS

- **Keepsakes:** Built a platform for scheduled message and video delivery to loved ones. Developed APIs using Node.js and Express, integrated Swagger for documentation, and implemented cron jobs to automate message scheduling and delivery
- **Car Wash CRM:** Developed a CRM system for onboarding sales teams and franchisees, managing bookings, and tracking leads from social media platforms. Built APIs, implemented role-based access panels, integrated Swagger, and created cron jobs for automated email and message notifications
- **Refreeze:** Created a platform for recruiter and candidate onboarding with referral management features. Developed APIs, implemented role-based access control, and set up cron jobs for automated messaging and email notifications
- **Accessed:** Developed a microservices-based HR and candidate portal handling chat, mail, calendar, and feed systems. Managed multiple microservices, built high-performance APIs, and ensured scalability with low-latency communication using Redis and Socket.IO
- **Ludo:** Built a multiplayer game with dynamic gameplay and integrated chat functionality. Implemented game logic, Socket.IO-based communication, and optimized backend performance for a seamless user experience
- **Roulette Suite:** Developed multiple timer-based betting games with fast transaction processing. Built scalable backend systems using Node.js, Redis, and Socket.IO to ensure low-latency operations and secure data handling with MongoDB
- **Wingo/Single Chance Timer:** Implemented a timer-driven betting game with instant result processing. Designed backend logic and ensured smooth gameplay using Redis, Socket.IO, and MongoDB
- **Dragon Tiger:** Developed a timer-based betting game with efficient result processing. Optimized backend performance and ensured reliable data handling using Redis and Socket.IO
- **Baccarat/Crazy Win:** Built a card-based betting platform with efficient transaction processing. Developed scalable backend systems using Node.js, Redis, and MongoDB
- **Sana Motor:** Developed a full-stack insurance platform integrating third-party services and secure payment gateways. Built APIs, handled integrations, and ensured a smooth and user-friendly experience
